Using the Delphi Technique to Develop a Peer-Review Debriefing Instrument for Simulation Healthcare Education

3:30-3:45 .......................... Closing/Evaluations/Certificates

Target Audience: Nursing faculty and clinical educators

Goal: To update nurses on educational trends relevant to the nursing profession.

Objectives:
Upon completion of the seminar, participants will be able to:
1. Describe the mission and purpose of the DPHMP for Delaware licensees.
2. Describe two ways to enter the DPHMP to support both public and workplace safety.
3. Explain the enrollment process into the DPHMP including basic monitoring requirements for participants, treatment providers and employers.
4. Differentiate between the roles of Reliant Behavioral Health (RBH) and the Board of Nursing.
5. Discuss 3-5 specific reasons why nursing must reinvent itself.
6. Identify 4 specific behaviors, mindsets, and patterns that no longer serve us.
7. Explain how nursing will evolve into a “superpower” in healthcare.
8. Discuss an understanding of what a flipped lesson is.
9. Identify basic tools to use to flip a classroom.
10. Identify risk factors linked to obesity.
11. Differentiate SMART Goals concerning fitness.
12. List 3 tips on healthy nutrition and exercise.
14. Describe the process of the Delphi technique to develop a peer-review debriefing instrument for simulation healthcare education.
